

# Your first line of **defence** against **Foot and Mouth**

Foot-and-Mouth Disease is highly contagious, but with the right precautions and careful disinfection, you can keep your farm protected.

## Essential Farm Biosecurity

- Limit access – only essential persons may enter
- All visitors must be issued clean, on-site protective footwear such as gumboots
- Ensure thorough disinfection of footwear before entry with foot dips at every entrance
- All vehicles entering must pass through a disinfectant wheel dip and be sprayed with disinfectant
- Wash ALL clothing used on farm in a hot wash cycle (70°C) to effectively kill viruses
- Ensure hand sanitiser is provided at each entry point for hand disinfection
- Monitor foot dips and wheel dips closely – replace or top-up disinfectants often for maximum efficacy

## Bitek's Powerful Disinfection Solutions

### GPC8™

**Powerful glutaraldehyde and QAC disinfectant with full spectrum activity**

- Bactericidal, fungicidal, and virucidal
- Tested against FMDV SAT 1, 2, and 3 (1:200 dilution)
- Vehicle spraying, wheel spraying, and foot dips (1:200 dilution)
- Effective even when used in high soiling conditions
- Non-corrosive
- Act 36 registered

### FAM 30™

**The ultimate solution for Foot-and-Mouth control**

- Full spectrum activity
- Wheel dips, footbaths, and general sanitising (1:200 dilution)
- High surfactant drives Iodine inside surfaces and organic material to reach pathogens
- The disinfectant of choice for high soiling conditions
- Colour coded to indicate activity
- Act 36 registered

### HANDSAN™

**Alcohol-based hand sanitiser**

- Bactericidal and virucidal
- Non-residue formulation
- High emollients for skin conditioning
- SABS registered
